INTERNAL MECHANISMS

Computer Controlled - Electro-mechanical - Multi-movement in Accurate Synchronization with Sound

Bear Country Jubilee

THROUGH ELECTRONIMATION tm

You can now bring the same magic to your amusement park previously available only to the world's most advanced parks.

We can assemble for you a fantastic cast of characters performing together in a magical show of music and laughter.

SINGERS — MUSICIANS — COMEDIANS

Each character radiates his own, unique personality, and is guaranteed to astound your audiences as the computer controlled miracle of electronimation takes command of their imaginations.

The shows pictured here are currently scheduled for installation Spring, 1978. As the system for programming any electronimated show is relatively simple, several shows of different lengths and content will be programmed to offer variety to the repeat customers of the parks.

The Santa Claus Revue

ELECTRONIMATION ON A BUDGET

Now you can also add high quality talking heads to your displays. With the accurate synchronization of lip movements and muscle action to any speech you may desire for your heads, you can dress up your dark rides, window displays, etc. with spell-binding magic.

Simply select any of the above faces and let us know how you would like the facial or head hair to look. You must be happy with your purchase. Ask about our money back guarantee.

HOW TO ORDER

Simply call or drop us a line, describing briefly what you are interested in, heads, individual characters, or complete shows. If you don't know what you want and are looking for suggestions, tell us your theme, and we'll be happy to help, complete with sketches and prices.
